

Recovery During Uncertain Times?

MAKE THE SMART CHOICE

LifeWorks Rehab®

CHANCES ARE, YOU'VE GOT A LOT OF QUESTIONS ABOUT CHOOSING THE RIGHT REHABILITATION SETTING RIGHT NOW.

And you should. Choosing the right place to recover can be critical to making a strong recovery after surgery, injury or illness, especially in today's uncertain times.

It's natural to want to get back home from the hospital as quickly as possible. But often, making a complete recovery requires more focus, tools, and specialized attention from a professional team of therapy and healthcare experts. Even in these uncertain times, an individualized recovery at a LifeWorks Rehab center is still the smarter choice.

At LifeWorks Rehab, we're committed to patient care, now and always. ***We provide patients with exceptional recovery experiences you will not find at home or anywhere else.***

TEN IMPORTANT QUESTIONS TO ASK WHEN CONSIDERING WHERE TO RECOVER

- 1 How much therapy and nursing care do I need to achieve my recovery goals?
- 2 How much therapy will I actually be getting? Can I get therapy 7-days-a-week?
- 3 Will I have access to the best therapy equipment and recovery tools?
- 4 What will my treatment be like? Will it be custom designed for me?
- 5 Will I allow a home health representative in my home?
- 6 What is my risk for a hospital readmission based on the severity of my illness or injury?
- 7 Can I measure my progress?
- 8 Can my family devote 24-hours-a-day to my recovery? Do they have the necessary skills to do so safely and effectively?
- 9 Will I be able to bathe, dress, and cook for myself?
- 10 What measures will be taken to protect me against the spread of illness?

HOW LIFEWORKS REHAB IS PROTECTING AGAINST COVID-19

Now more than ever, we are committed to meeting the critical needs of our community. Our top priority is the health, safety and recovery of our patients. To help protect our patients against COVID-19 we have implemented the following preventative measures:

- Sanitizing and disinfecting with world-class technology that is significantly more effective than typical industry disinfecting procedures
- Educating on COVID-19 symptoms, infection controls, social distancing and proper hand washing
- Conducting routine monitoring of patient and staff health
- Conducting comprehensive CV-19 antigen testing and screening of patients and staff as needed
- Postponing communal dining, congregate therapy and group activities
- Carefully monitoring and regulating visitation in compliance with CMS requirements
- Following all regulatory requirements and guidelines

WORLD-CLASS DISINFECTING TECHNOLOGY

- Unique and highly effective Electrostatic Spraying System (ESS)
- Significantly more effective than typical industry disinfecting procedures
- Widespread sanitizing and disinfecting by surrounding all surfaces
- Cleaning component Noroxycdiff*
— Manufacturer label claims efficacy against family of coronaviruses

**Included on EPA list for use against SARS Co-V2*

KEEPING YOU CONNECTED:

We understand how important communication with family and friends is during a patient's recovery. When loved ones cannot visit in-person, our staff is available to assist patients with virtual visitation, including video calling. Our staff is also routinely checking in with residents to make sure they feel supported.

COMPARING THE LIFEWORKS REHAB PROGRAM AND HOME HEALTH

The LifeWorks Rehab Difference:

FEWER READMITS

Customized therapy programs with proven lower readmission rates

COMPREHENSIVE RECOVERY CARE

24-hour-a-day care in a total recovery environment
